Who is it for

Whether you want to become a certified **RPA Developer, RPA Solution Architect, RPA Business Analyst, RPA Implementation Manager** or even an **RPA Infrastructure Engineer**, UiPath Academy has you covered with free learning resources.

Get Certified as an RPA Developer

Robotic Process Automation is quickly becoming a “must-have”. Just as almost everyone now uses a computer for their job, “a software robot for every employee” is on the horizon. Businesses without RPA have a competitive disadvantage.

The RPA Developer Certificate attests that the graduate has attained in-depth knowledge about the UiPath components and features. It also validates the graduate's ability to successfully automate a real-life project based on UiPath best practices and automation principles, thus being qualified to fulfill any of the key roles in an RPA Center of Excellence.

Step
01

Graduate the RPA Developer Learning Path on UiPath Academy

Step
02

Sign up to our Certification Platform

Step
03

Take the exam

Get Certified

Testimonial

“We believe that proper training is essential to roll out company-wide RPA initiatives and realize further business value. In that sense, the Academy gives us the essential skills and knowledge to make our RPA journey successful from both technical and business sides.”

Kazunari Akishige – RPA CoE Leader, SMFL Capital
